 Marine, Tropical and Tsunami Services Branch

Subject: Discontinuing Experimental Satellite Rainfall Graphics: Effective
October 25, 2016

The National Hurricane Center (NHC) Tropical Analysis and Forecast Branch (TAFB) will discontinue the Experimental Satellite Rainfall Graphics on the Tropical Rainfall webpage, effective Tuesday, October 25, 2016.

These graphics were intended to support international partners who are unable to get rainfall estimate information from other sources. The source of the information for the product is not operational and the information is not received reliably. A new experimental rainfall product is planned when GOES-R data become available and techniques are developed. Text-based satellite rainfall estimates will continue to be available at the following site:

www.nhc.noaa.gov/marine/rainfall

For more information, contact:

Jessica Schauer
NWS Marine, Tropical and Tsunami Services Branch
Miami, FL
Telephone: 305-229-4476
