Subject: Updated: Addition of Tropical Cyclone Storm Surge Watches and Warnings for the Atlantic and Gulf Coasts of the Contiguous United States: Effective on or Around June 22, 2017

Updated effective date to on or about June 22, 2017.

The NWS will have the ability to issue new Storm Surge Watches and Warnings for the Atlantic and Gulf Coasts of the contiguous United States effective on or around June 1, 2017; however, implementation of changes to the NWS Point Forecast application for the new Storm Surge Watches and Warnings will be delayed until approximately June 22, 2017. The NWS Point Forecast application can be found at:

http://forecast.weather.gov

If a Storm Surge Watch or Warning is issued prior to their implementation on the NWS Point Forecast application, the watch, warning, and advisory (WWA) map and point forecast pages will not show the active Storm Surge Watch or Warning. Web graphics for active Storm Surge Watches and Warnings will be available on the National Hurricane Center website at:
http://hurricanes.gov
