Service Change Notice 17-27  
National Weather Service Headquarters Silver Spring MD  
225 PM EST Thu Mar 9 2017

To:           Subscribers:  
              -NOAA Weather Wire Service  
              -Emergency Managers Weather Information Network  
              -NOAAPort  
              Other NWS Partners and NWS Employees

From:        Allison Allen  
              Chief, Marine, Tropical and Tsunami Services  
              Branch

Subject:     Discontinuation of the Experimental Hurricane  
              Threats and Impacts Graphics  
              Web Interface: Effective April 10, 2017

Effective April 10, 2017, the NWS will discontinue the experimental Hurricane Threats and Impacts Graphics Web Interface, also known as HTI-Web. This service was previously found on the following site:

<http://preview.weather.gov/hti>

The experimental interface provided access to the Hurricane Threats and Impacts Graphics. The Hurricane Threats and Impacts Graphics can still be found on the following site in downloadable KML format:

<http://weather.gov/hti>

The Hurricane Threats and Impacts are also available on the National Digital Forecast Database Graphical Forecast site:

<http://digital.weather.gov>

Feedback provided by users suggested that large-scale changes to the interface are necessary to improve usability. More development work is required to make the page reliably functional. It is anticipated that a new web interface will be available for comment and review once development of this work is completed.
