Subject: Use of Mixed-Case Text/95 ASCII Character Set in Selected Marine Text Products:
Effective June 1, 2017

Effective Thursday June 1, 2017, NWS will transition the following marine (coastal and Great Lakes) text products issued by Weather Forecast Offices (WFO), NCEP National Hurricane Center (NHC) and the Ocean Prediction Center (OPC) from all capital letters to a mixed-case text format/expanded 95 ASCII character set:

<table>
<thead>
<tr>
<th>Product Name</th>
<th>AWIPS ID*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coastal Waters Forecast</td>
<td>CWFXXX</td>
</tr>
<tr>
<td>Great Lakes Open Lake Forecast</td>
<td>GLFXXX</td>
</tr>
<tr>
<td>Great Lakes Nearshore Marine Forecast</td>
<td>NSHXXX</td>
</tr>
<tr>
<td>Surf Zone Forecast</td>
<td>SRFXXX</td>
</tr>
<tr>
<td>Other Marine Reports</td>
<td>OMRXXX</td>
</tr>
<tr>
<td>Offshore Marine Forecast</td>
<td>OFFXXX</td>
</tr>
<tr>
<td>NAVTEX Marine Forecast</td>
<td>NAVXXX</td>
</tr>
<tr>
<td>Collaborative Nearshore Swell and Wind Forecast for Oahu</td>
<td>SRDHFO</td>
</tr>
<tr>
<td>Generalized Statewide Coastal Waters Forecast for Hawaii</td>
<td>CWFHI1</td>
</tr>
</tbody>
</table>

* XXX is the WFO or Center Three-Letter ID

Examples of marine text products in mixed case are online at:

http://www.nws.noaa.gov/om/pns/mc-marine.docx

All of the sample products are shown for sample formatting purposes only and have not been issued. If weather conditions prevent any WFO or Center from making this change on June 1, 2017, the change to the mixed-case text format will occur on the next suitable day.
This roll-out of the mixed-case text format for marine products was preceded by the Marine Interpretation Message (MIM), issued by the Centers on November 30, 2016. See SCN 16-46 posted at

NWS will notify partners/users of future product implementations via Service Change Notices (SCN) with at least 30 days lead time. These notices will include AWIPS product identifiers and actual effective dates.

Partners and users of NWS text products should modify their systems to accommodate mixed case and the expanded character set. This change will make text products easier to read and allow users to click on links directly rather than requiring conversion to lowercase or mixed case.
