Starting immediately through December 31, 2018, National Center for Environmental Prediction (NCEP) Central Operations (NCO) will be implementing secure HTTPS protocols. These changes will include:
- Enabling HTTPS for sites that were previously HTTP-only
- Redirecting HTTP traffic for all sites
- Redirecting HTTPS handshakes to Cipher secure suites
- Enabling a configuration that marks the affected sites for HTTPS Strict Transport Security (HSTS)

The following domains, and all websites under them, will only be accessible at https:
- X.ncep.noaa.gov
  Where X is defined as, but not limited to: opc, wpc, cpc, nhc, nomads, ftp, mrms, madis, and mag
- X.weather.gov
  Where X is multiple sites nested under the domain weather.gov.
  - tgftp.nws.noaa.gov

There are no changes to ftp services offered through those domains. This change is following the Homeland Security Binding Operational Directive, BOD-18-01.

For more information and questions about impacted Websites, please contact both:

Doug Fenderson
NCO/Information and Web Services Branch
College Park, MD
doug.fenderson@noaa.gov

or

Carissa Klemmer
