Subject: Seeking Comments on the Termination of NWSTG TUA
 to BUFR Conversion through Oct 16, 2019

The National Centers for Environmental Prediction (NCEP) Central Operations (NCO) is seeking public comment through October 16, 2019, on terminating the NWS Telecommunication Gateway (NWSTG) conversion of legacy Traditional Alphanumeric Code (TAC) Upper Air (TUA) products to Binary Universal Form for the Representation (BUFR) format over AWIPS/NOAAPORT.

The purpose of the NWSTG TUABUFR conversion application was to support the Radiosonde Replacement System (RRS), which was creating bulletins in the TAC format and needed the NWSTG to convert the products to be compliant with the World Meteorological Organization (WMO) standards.

The RRS now produces upper air bulletins in BUFR format, thus eliminating the need for conversion.
