Subject: Updated: Changes to Public and Fire Forecast Zones for
 Weather Forecast Office (WFO) Gaylord, MI effective
 April 2, 2019

Updated to change implementation date to April 2, 2019, due to
the Government Lapse in Appropriations.

Effective Tuesday, April 2, 2019, at 800 AM Central Daylight
Time (CDT), 1300 Coordinated Universal Time (UTC), the National
Weather Service (NWS) WFO in Gaylord, Michigan (APX) will change
Public and Fire Weather Forecast Zones encompassing Chippewa and
Mackinac Counties in eastern Upper Michigan, as well as
Charlevoix County in northwest Lower Michigan. Upon
implementation of this change, all public and fire forecasts and
related products will use the zone numbers and names shown
below.

If April 2, 2019, is declared a Critical Weather Day, this
implementation will be postponed to April 4, 2019.

The zone changes will improve services by allowing more fine-
tuned warnings and advisories for hazards, especially during the
cold season. The new zones will be divided as follows:

1. Current Chippewa County forecast zone (MIZ008) into three
zones:

 Western Chippewa County
 Central Chippewa County
 Southeast Chippewa County

2. Current Mackinac County forecast zone (MIZ015) into three
zones:

 Western Mackinac County
 Eastern Mackinac County
 Mackinac Island/Bois Blanc Island

3. Separate Beaver Island in northern Lake Michigan into its
own forecast zone apart from "mainland" Charlevoix County

(MIZ019).

The new zone numbers, names, and description of the zone area are listed below. Note that the NWS forecast office in Marquette, Michigan (WFO MQT) has fire weather forecast responsibility for Chippewa and Mackinac Counties.

WFO Gaylord Public Forecast Zones (WFO Marquette Fire Weather Zones) being divided:

Zone Number	Zone Name
MIZ008	Chippewa
MIZ015	Mackinac
