 Other NWS Partners and NWS Employees

From: Kathryn Gilbert
 Acting Director, Weather Prediction Center

Subject: Change in the Scheduled Issuance Time of the Day 1
 WPC Excessive Rainfall Outlook Effective
 March 14, 2019

Effective Tuesday, March 14, 2019, the National Centers for Environmental Prediction (NCEP) Weather Prediction Center (WPC) will issue the first scheduled update to the Day 1 Excessive Rainfall Outlook (ERO) at 1600 UTC instead of 1500 UTC.

This change will enable high-resolution model guidance initialized at 1200 UTC to be incorporated into the update and make the valid time of the outlook 20 hours instead of 21 hours.

No changes will be made to the other standard issuance times of the Day 1 ERO. The Day 1 Outlook will still be scheduled 3 times per day:

- Initial issuance by 0830 UTC
- Scheduled updates by 1600 UTC and 0100 UTC

Unscheduled updates may occur infrequently to address rapidly changing conditions.

Products affected by this change include the Excessive Rainfall Discussion (QPFERD) and related web graphics at the following links:

<https://www.wpc.ncep.noaa.gov/discussions/hpcdiscussions.php?disc=qpferd>
http://www.wpc.ncep.noaa.gov/qpf/excess_rain.shtml

as well as the following:

Product	WMO Header	AWIPS ID
-----	-----	-----
Day 1 Graphic	MENC98 KWNH	RBG94E
