FROM:     Mark B. Miller
Director, Surface and Upper Air Division
Office of Observations

SUBJECT:  Transition of Manual Radiosonde Observations to Automated
Radiosonde Observations at Nome, AK, on or after
August 12, 2019

Effective on or after August 12, 2019, radiosonde observations (RAOB)
from Nome, AK, WMO# 70200, Station ID PAOM, will be transitioned from the
manually launched Lockheed Martin 1680 MHz LMS6 radiosonde to the Vaisala
403 MHz RS41-SGPA radiosonde using the Vaisala Autosonde as the
launch vehicle.

During the transition period of up to 30 days, dual radiosonde flights
may be performed until the Vaisala Autosonde System is declared
operational for the regularly scheduled observations of 00Z and 12Z.

Messages from the Vaisala Autosonde currently do not contain the
following components: RADAT, High Res BUFR, NCEI archive format. A
software update will be implemented in 2019 that will produce these data.

For additional information on the message requirements, see WMO
306 Manual on Codes (International Codes):
- Volume I.1 Part A - Alphanumeric Codes
- Volume I.2 Part B - Binary Codes
- Volume II Regional Codes and National Coding Practices (WMO Region IV)

A follow up Service Change Notice will be issued when the above stated
software update is implemented and the Autosonde RAOB products contain
these components.

If you have questions or feedback, please contact:
