FROM: C. Bruce Entwistle
Chief, Aviation Space Weather Services Branch

SUBJECT: Updated: Implementation of TAF Service for Minden-Tahoe Airport (KMEV) in Nevada has been delayed until further notice

NOTE: The following changes have no impact on NOAA Weather Wire Service subscribers

Updated to delayed implementation until further notice. A new Service Change Notice will be send when a date is determined.

Implementation of TAF Service for Minden-Tahoe Airport (KMEV) in Nevada is delayed until further notice. The Automated Weather Observing Station (AWOS) for Minden-Tahoe Airport in Minden, NV is out of service and the repair work is yet to be completed. Once repairs are complete and the AWOS is operational, the NWS office in Reno, NV, will begin Terminal Aerodrome Forecast (TAF) service for the airport.

This delay impacts the following identifiers:

<table>
<thead>
<tr>
<th>Airport Name</th>
<th>WMO Heading</th>
<th>AWIPS ID</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minden-Tahoe Airport</td>
<td>FTUS45</td>
<td>KREV</td>
</tr>
</tbody>
</table>

In addition, this TAF will not appear in existing TAF collectives with the following WMO headers until service begins:

- FTUS80 KWBC Non-FAA Domestic and Family of Services
- FTUS90 KWBC FAA Weather Message Switching Center and FAA Facilities
- FTUS52 KWBC Global Telecommunication System Customers
- FTUS24 KWBC World Area Forecast Center (WAFC)

For questions regarding this TAF, please contact:
