To: National Weather Service (NWS) Offices
Federal Aviation Administration (FAA) Customers
Family of Services (FOS) Subscribers
Other Customers of NWS Aviation Forecasts

From: Cyndie Abelman
Chief, Aviation Services Branch

Subject: Corrected: Change of Terminal Aerodrome Forecast (TAF) Service for the Replacement St. George, UT, Airport (KDXZ):
Effective January 12, 2011

Note: The following changes have no impact on NOAA Weather Wire Service subscribers.

Corrected station identifier in subject line to KDXZ.

Effective January 12, 2011, at 1800 Coordinated Universal Time (UTC), the NWS Office in Salt Lake City, UT, will begin disseminating the St. George, UT, Airport TAF under a new identifier: KDXZ. Routine and updated TAFs will be issued for the replacement airport, 24 hours a day.

The effective date of this change is sooner than NWS policy (NWS instruction 10-1805). The reduction of normal lead time for this change occurred after coordination with local customers and the Federal Aviation Administration (FAA).

NWS personnel will need to add the following identifier to their communications systems to receive the new TAF:

<table>
<thead>
<tr>
<th>Airport</th>
<th>WMO Heading</th>
<th>AWIPS ID</th>
</tr>
</thead>
<tbody>
<tr>
<td>St. George</td>
<td>FTUS45 KSLC</td>
<td>TAFDXZ</td>
</tr>
</tbody>
</table>
In addition, the new TAF will be added to the existing TAF collectives below, which are transmitted to Federal Aviation Administration (FAA) personnel and other external users.

WMO Headings available to the Following Customers:
FTUS80 KWBC Non-FAA Domestic and Family of Services
FTUS90 KWBC FAA Weather Message Switching Center and FAA Facilities
FTUS52 KWBC Global Telecommunication System Customers

Holders of NWS procedural instruction 10-813 (Terminal Aerodrome Forecasts) should make appropriate additions to the appendices.

If you have questions regarding this TAF change, contact:
