To: National Weather Service (NWS) Offices
   Federal Aviation Administration (FAA) Customers
   Family of Services (FOS) Subscribers
   Other Customers of NWS Aviation Forecasts

From: Cyndie Abelman
      Chief, Aviation Services Branch

Subject: Change of Terminal Aerodrome Forecast (TAF) Service for
the St. George, Utah Airport (KSGU): Effective December 15, 2011

Note: The following changes have no impact on NOAA Weather Wire Service subscribers.

Effective December 15, 2011, at 1900 Coordinated Universal Time (UTC), the NWS Office in Salt Lake City, UT, will begin disseminating the St. George, Utah Airport TAF under the old airport identifier (KSGU). KDXZ was a temporary identifier for the new airport in St. George, and the Federal Aviation Administration (FAA) and airport have requested that the old identifier (KSGU) be re-established. Routine and updated TAF issuances will continue to be disseminated 24 hours a day.

NWS personnel will need to make the following change to their communications systems to receive the new TAF:

<table>
<thead>
<tr>
<th>Airport</th>
<th>WMO Heading</th>
<th>AWIPS ID</th>
</tr>
</thead>
<tbody>
<tr>
<td>St. George</td>
<td>FTUS45 KSLC</td>
<td>TAFSGU</td>
</tr>
</tbody>
</table>

In addition, the new TAF will be added to the existing TAF collectives below, which are transmitted to FAA personnel and other external users.

WMO Headings available to the Following Customers:
FTUS80 KWBC Non-FAA Domestic and Family of Services
FTUS90 KWBC FAA Weather Message Switching Center and FAA Facilities
FTUS52 KWBC Global Telecommunication System Customers
Holders of NWS procedural instruction 10-813 (Terminal Aerodrome Forecasts) should make appropriate additions to the appendices.

If you have questions regarding this TAF change, contact:

Larry Dunn, Meteorologist-in-Charge
