From: Allan Darling
Deputy Director, NCEP Central Operations

Subject: Termination of Select Global Forecast
System (GFS)Products: Effective June 3, 2014

Effective Tuesday, June 3, 2014, with the 1200 Universal Coordinated Time (UTC) cycle, the National Centers for Environmental Prediction (NCEP) will stop producing some low-resolution gridded products, text products in obsolete formats, and legacy graphical products from the Global Forecast System (GFS), and stop disseminating them via NOAAPORT.

A Public Information Statement was issued on February 19, 2014 requesting comments on the proposed termination of multiple legacy GFS products.

www.nws.noaa.gov/os/notification/pns14gfs_legacy_removal.htm

Based on responses received, NWS will terminate the following products on June 3, 2014:

Gridded Products:

- 0.5 degree resolution RTG Sea Surface Temperature(SST) analysis
- 1 degree Reynolds 7-day SST analysis on Family of Services grid
- 1 degree Reynolds 7-day SST analysis on WAFS grid
- GRIB1 GFS model output on AWIPS grid 213 for a 95km CONUS domain

Text Products:

- Upper Wind Fallout Forecasts
- GFS output in legacy GRID format
- Text bulletins of ship observations from GFS analysis

Graphical Products:

- Redbook graphics plots of normal maximum and minimum temperature

- Facsimile (FAX) charts of winds and temperatures at various flight levels
- FAX charts of surface analyses for various domains

More specific details about the products, including the WMO headers of these products, are provided at:

http://www.nco.ncep.noaa.gov/pmb/changes/docs/gfs_legacy_remove2014_final.shtml

If you have questions about this termination, please contact:
