Technical Implementation Notice 14-51
National Weather Service Headquarters Washington DC
112 PM EST Mon Dec 8 2014

To: National Weather Service (NWS) Offices
    Federal Aviation Administration (FAA) Customers
    Family of Service (FOS) Subscribers
    Other Customers of NWS Aviation Forecasts

From: Mark Zettlemoyer
    Acting Chief, Aviation Services Branch

Subject: Implementation of Terminal Aerodrome Forecast (TAF) Service for SGJ, Northeast Florida Regional Airport, St. Augustine, FL: Effective: April 7, 2015

Note: The following changes have no impact on NOAA Weather Wire Service subscribers.

Effective Tuesday, April 7, 2015, at 1200 Coordinated Universal Time (UTC), the NWS office in Jacksonville, FL, will begin TAF service for Northeast Florida Regional Airport in St. Augustine, FL. After that date, routine and updated TAFs will be issued for this airport 24 hours a day.

NWS personnel/offices will need to add the following identifier to their communications systems to receive the new TAF:

Airport Name                          WMO Heading   AWIPS ID
------------                          -----------   --------
Northeast Florida Regional Airport    FTUS42 KJAX   TAFSGJ

In addition, the new TAF will be added to the existing TAF collectives below, which are transmitted to Federal Aviation Administration (FAA) personnel and other external users.

WMO Headings     Available to the Following Customers:
--------------------  ------------------------------
FTUS80 KWBC         Non-FAA Domestic and Family of Services
FTUS90 KWBC         FAA Weather Message Switching Center and FAA Facilities
FTUS52 KWBC         Global Telecommunication System Customers

Holders of NWS Procedural Instruction 10-813 (Terminal Aerodrome
Forecasts) should make appropriate additions to the appendices.

For questions regarding this new TAF, please contact:
