Subject: Modifying Product Dissemination Time of the NCEP/FNMOC Combined Wave Ensemble Product (NFCENS): Effective March 14, 2016

Effective on or about March 14, 2016, beginning with the 1200 Coordinated Universal Time (UTC) run, the National Centers for Environmental Prediction (NCEP) will be changing the delivery time of the NFCENS products.

The NFCENS product consists of a combination of wave ensemble outputs from the NOAA WAVEWATCH III wave ensemble system, and from the wave ensembles run by the US Navy Fleet Numerical Meteorology and Oceanographic Center (FNMOC). The product combines outputs from a total of 41 wave ensemble members; one control run and 20 members from the NCEP system, and 20 additional members from FNMOC.

After an upgrade to FNMOC's ensemble system, delivery of upstream products to NCEP have been delayed. This has resulted in the NFCENS system running without FNMOC input. Therefore, NCEP will delay the NFCENS distribution time by 2 hours to ensure inclusion of FNMOC data. Delivery of NFCENS products to the National Hurricane Center (NHC), Ocean Prediction Center (OPC) and to the public, will be delayed by two hours relative to the current distribution time.

The delayed delivery time would affect all NFCENS products distributed, to include:

ftp://ftp.ncep.noaa.gov/pub/data/nccf/com/wave/prodnomads.ncep.noaa.gov/pu
b/data/nccf/com/wave/prod nomads.ncep.noaa.gov
(grib filter and OpenDAP)

For questions regarding these time changes, please contact:
