

# Strong Winds, Heavy Rain, and Coastal Flooding Expected

New York, NY  
WEATHER FORECAST OFFICE

## Wind Watches Warnings and Advisories

Overview

- Deepening low pressure will produce strong winds, heavy rain, and coastal flooding tonight.

HAZARDS & IMPACTS

- **Peak Winds:** 25-35 mph with gusts to 50 mph. A few locally higher gusts possible. Strong winds will blow down tree limbs and blow around unsecured objects. A few/scattered trees and power lines could be downed. Travel will be difficult, especially for high profile vehicles.
- **Heavy Rain:** Around 1.5 inches of rain is expected. Minor urban and poor drainage flooding possible. Isolated/localized flash flood threat near fast responding rivers and streams in NJ.
- **Coastal Flooding:** Minor to Moderate flooding. The most significant flooding is expected to be along the western portion of Long Island Sound.

## Marine Watches Warnings and Advisories

NWS ALERTS

- **Wind Advisory:** 8 pm to 6 am (see map for locations).
- **Gale Warning:** 6 pm to 6 am for all coastal waters.
- **Coastal Flood Warnings and Advisories:** Around the times of high tide late tonight (see map for locations)

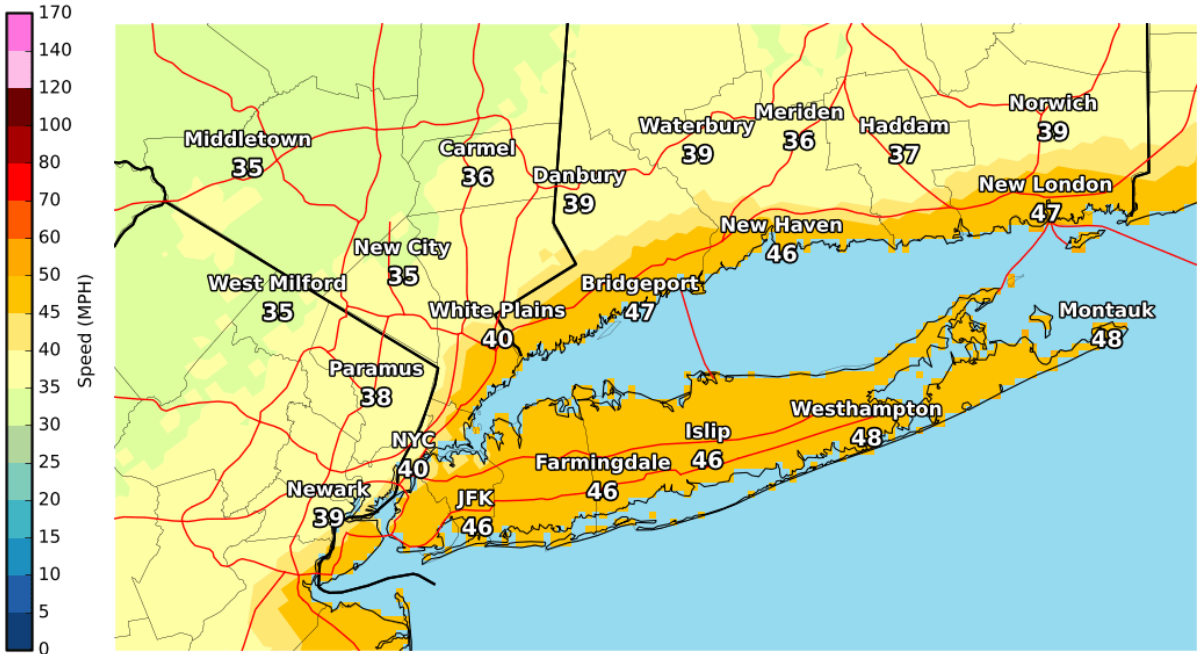

NEXT BRIEF

- By 6 pm Monday.
