

# Dangerously Cold Wind Chills Late Friday into Saturday

## OVERVIEW

- A cold front tracks through the region late Thursday night into Friday morning, ushering in a brief shot of arctic air. Wind gusts up to 45 mph behind the frontal passage will lead to sub-zero wind chill values Friday into Saturday.

### HAZARDS & IMPACTS

- Temperatures:** Between 10° to -5° Friday night through Saturday morning.
- Wind Chills:** Between 0° and -20° Friday afternoon through Saturday morning. Hypothermia is possible if proper precautions are not taken. Frostbite may occur in as little as 30 minutes on exposed skin.

### NWS ALERTS

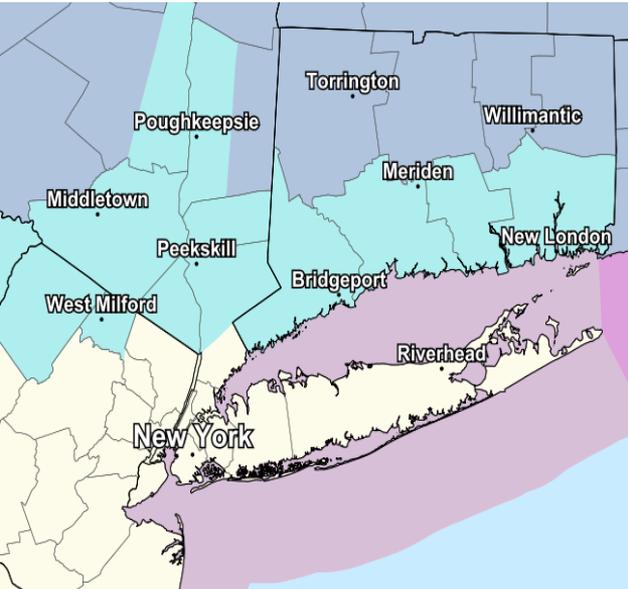

- Wind Chill Advisory:** Southern Connecticut, lower Hudson Valley, and W. Passaic in northeast New Jersey from 5 PM Friday to 9 AM Saturday for wind chill values between -15° and -25°.
- Gale Watch:** NW gusts 35 to 45 mph on all waters Friday into early Saturday morning. Freezing spray possible Friday night through Saturday.

### FORECAST CHALLENGES

- Slightly colder air or stronger winds could lead to wind chills as low as 30 below in parts of interior southern Connecticut.
- A Special Weather Statement will likely be needed for areas outside the advisory for sub-zero wind chills Friday night into Saturday morning.
- Freezing spray headlines may be needed for marine waters.

### NEXT BRIEF

- By 6 PM Thursday.

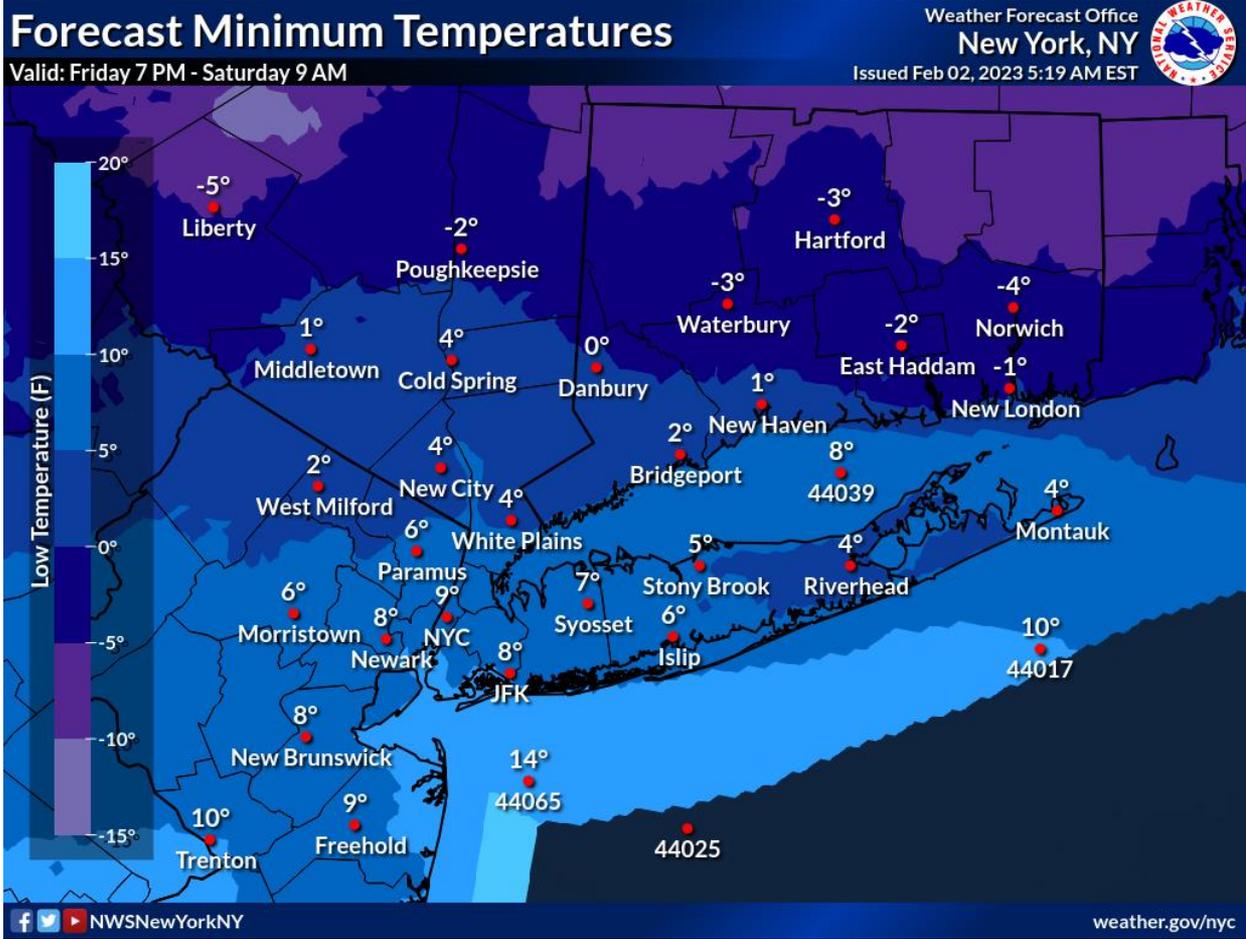

- Gale Warning
- Wind Chill Warning
- Wind Chill Advisory
- Small Craft Advisory
- Freezing Spray Warning
- Gale Watch
