At 914 AM EST, widespread heavy snow combined with north winds of 20 to 30 mph will reduce visibilities making any outdoor activities hazardous.

Maximum hourly snowfall rates will range from 1 to just over 3 inches, causing snow to rapidly accumulate as temperatures fall through the 20s. Isolated rumbles of thunder will accompany the heavy snowfall rates.

Travel is extremely dangerous.

Blowing and drifting snow as winds gust between 35 and 45 mph could still cause locally hazardous travel conditions tonight. Roads that had been previously cleared of snow may once again become snow covered. Localized whiteout conditions may even be possible in exposed areas such as near open fields. Exercise extra caution when out driving tonight.
