In southwest Brooklyn, the shoreline communities including Sea Gate, Coney Island, and Manhattan Beach, experienced significant inundation from storm tide and wave action. Numerous homes in this area experienced major structural damage. Inundation extended inland to Avenue X into Bensonhurst, Gravesend and Sheepshead Bay, shutting down the Belt Parkway. In southeast Brooklyn, the hardest hit areas were Gerritsen Beach, Floyd Bennet, Bergen Beach, Mill Basin, and Canarsie due to inundation from Jamaica Bay and Rockaway Inlet several blocks inland.

Across the Rockaways, up to 4 and 7 feet of inundation was exhibited over the peninsula due to surge from Jamaica Bay on the north side and from surge and wave action from the Atlantic Ocean on the south side. Widespread major damage was experienced across the entire length of the Rockaways, with numerous homes and businesses in Breezy Point, Arverne-Edgemere and Seaside experiencing complete destruction. Atlantic Ocean facing shoreline structures, such as boardwalks and several oceanfront homes were destroyed due to runup and setup on top of storm tide from high wave action of at least 10 to 15 feet from the Atlantic Ocean.
Belt Parkway – Several feet of inundation on Belt Parkway Eastbound by the Verrazanno

Gerritsen, Brooklyn – several ft of inundation at Brigham St and Emmons Ave, and at Knapp St and Belt Parkway
