Lightning caused a fire at a barn at the corner of SW 19th Street and Santa Fe with most of the barn and its contents destroyed. Lightning also caused a power surge at the 911/Emergency Ops Center facility, causing equipment failure and a momentary disruption of service.

A line of severe thunderstorms moved across much of western Oklahoma and portions of central Oklahoma during the afternoon and evening of the 22nd. In addition to numerous reports of large hail, hail the size of baseballs (2.75 inches) destroyed the windshield of a law enforcement vehicle 4 miles northeast of Manitou in Tillman County, and in El Reno in Canadian County, a trailer 14 feet wide and 56 feet long and a boat out of the water were blown over.

See summary at end of February 24th storm reports for more information.

Hail was reported in the southeast portion of the city.
Severe thunderstorms moved across portions of northwest Oklahoma the evening of the 24th. One thunderstorm spawned a tornado in northeast Lipscomb County Texas (See Amarillo Texas StormData for more information on the Texas segment) and tracked across the Texas/Oklahoma State border, 2 miles west of Catesby in Ellis County at 2029 CST. High power lines were downed, and numerous outbuilding were destroyed on the state border. The tornado then struck a house 1.5 miles northwest of Catesby. Approximately 75 percent of the roof and the north side wall of the upstairs attic were blown off. A nearby windmill was also knocked down. The tornado then continued northeast and struck another house 6 miles northeast of Catesby, very close to US 283 and the Ellis/Harper county line. Approximately 75 percent of the roof was blown off; outbuildings were destroyed; a porch was damaged, and trees were partially stripped of their limbs. As the tornado moved into Harper County, a hog barn near the Ellis/Harper county line received minor roof damage, while power lines in southern Harper County were blown down near the intersection of US 283 and US 270. The tornado is then believed to have dissipated in the North Canadian River valley about 5 miles southeast of Laverne. Damage in Ellis County was rated F1, while damage in Harper County was rated F0. Soon after the tornado dissipated straight-line winds blew over a fence 6 miles southwest of Buffalo and a large truck in the front yard of a house 3 miles west of Buffalo in Harper County. In Beckham County 2 miles south of Erick, windows were blown out of a pick-up truck; minor roof damage was reported on the east side of Hollis in Harmon County, and a semi-truck was blown over 1 mile west of Canute in Washita County.

Lightning struck a power pole that served power to the courthouse, knocking out electricity to half the building and destroying an air conditioning unit.

A long line of severe thunderstorms moved through western portions of north Texas during the afternoon of the 22nd. One tornado developed in open country 5 miles west-northwest of Vernon and traveled 1 mile before becoming wrapped in rain. The tornado continued to track for approximately another mile before lifting. No damage was reported with the tornado and thus was rated F0. In Crowell in Foard County, numerous roofs and vehicles were damaged by hail to the size of golf balls (1.75 inches), while in Burkburnett in Wichita County, the roof was blown off a pressbox at the football stadium at Burkburnett High School, and a shed also at the school was blown over.
