Ice Storm

10/28/20 21:00 CST

0

A historic early season ice storm occurred over a several day period on the morning of the 26th and continuing into the evening of the 28th. Freezing rain and sleet were reported across much of central and western Oklahoma, with some snow reported as well across far northwest Oklahoma. Extreme freezing rain accumulations of at least 1.5 inches were reported in west-central Oklahoma over the 3 day period, with greater than 0.5 inch totals reported over a large area from Ponca City to Oklahoma City to Lawton to Clinton. Hundreds of thousands of people were without power by the 28th and extensive tree and powerline damage was reported across much of the area.

loo Storm

10/28/20 12:00 CST

An multi-day early season ice storm impacted western north Texas beginning the morning of the 26th and lasting into the 28th. Highest ice accretion totals were found closer to the Red River, but power outages and downed power lines were reported in many areas.
