THUNDERSTORM SAFETY FOR YOU AND YOUR FAMILY

BEFORE A THUNDERSTORM

- Be Weather-Ready: Check the forecast regularly to see if you're at risk for severe thunderstorms. Listen to local news or a NOAA Weather Radio to stay informed about watches and warnings. Preparation is key to staying safe and minimizing impacts.
- Sign Up for Notifications: Know how your community sends warnings. Check media severe thunderstorm alerts available in your area.
- **Create a Communications Plan:** Have a family plan that includes an emergency meeting place. Pick a safe room in your home such as a basement, storm cellar or an interior room on the lowest floor with no windows.

Get more details at ready.gov/make-a-plan

- Practice Your Plan: Conduct a family severe thunderstorm drill regularly so everyone knows what to do if damaging wind or large hail is approaching. Don't forget pets.
- Prepare Your Home: Keep trees trimmed near your house. If you have time before severe weather hits, put away loose objects, close windows and doors, and move valuable objects inside or under a sturdy structure.
 - **Help Your Neighbor**: Take CPR training so you can help if someone is hurt during severe weather. Conduct a drill with elderly or disabled neighbors.

Sit down with your family or friends and develop a communications plan. Photo NOAA

DURING A THUNDERSTORM

- Stay Weather-Ready: Continue to listen to local news or a NOAA Weather Radio to stay updated about watches and warnings.
- At Your House: Go to your secure location if you hear a severe thunderstorm warning and damaging wind or large hail is approaching. Take your pets if time allows.
- At Your Workplace or School: Stay away from windows if you are in a severe thunderstorm warning. Damaging wind or large hail could blow a heavy object at windows. Do not go to large open rooms such as cafeterias, gymnasiums or auditoriums.
- ✓ Outside: Go inside a sturdy building immediately if severe thunderstorms are approaching. Sheds and storage facilities are not safe. Taking shelter under a tree can be deadly. The tree may fall on you and you are at risk of getting struck by lightning.
- In a Vehicle: Being in a hard-topped vehicle is safer than being outside; however, if you have time, drive to the closest secure shelter.

AFTER A THUNDERSTORM

Stay Informet: Keep your NOAA Weather Radio or portable radio with you in your safe place/shelter, so you can listen for updates on watches and warnings and know whether the threat has passed.

✓ Contact Your Family and Loved Ones:

- Let your family and close friends know you're okay so they can help spread the word. Power may be out and phone lines may be down.
- Assess the Damage: After you are sure the severe weather threat has ended, check your property for damage. When walking through storm damage, wear long pants, a long-sleeved shirt and sturdy shoes. Contact local authorities if you see power lines down. Stay out of damaged buildings. Be aware of insurance scammers if your property has been damaged.
- Help Your Neighbor: If you see someone injured, call 911. Then, if you are trained, provide first aid until emergency responders arrive.

THUNDERSTORMS

Severe Thunderstorm Watch: Borrepared

Severe thunderstorms are possible in and near the watch area. Stay informed and be ready to act if a severe thunderstorm warning is issued. Watches are issued by the Storm Prediction Center (*Spc.noaa.gov*) for counties where severe thunderstorms may occur. The watch area is typically large, covering numerous counties or even states.

Severe Thunderstorm Warning: Take Action!

A severe thunderstorm has been indicated by radar or reported by a spotter producing hail one inch or larger in diameter and/or winds exceeding 58 mph. Warnings indicate imminent danger to life and property. Take shelter in a substantial building. Severe thunderstorms can produce tornadoes with little or no advance warning.

After a tornado, watch out for dangerous debris, such as sharp metal, glass, or downed power lines.. Photo: NOAA
