

I.5-FILECRAT OPERATIONAL FORECAST SYSTEM FILE CREATION PROGRAM
(FILECRAT)

Program FILECRAT is used to create the Operational Forecast System data files.

The following data bases or files can be specified:

- o Extended Streamflow Prediction System Parameter File (ESPP)
- o Forecast Component Data Base (FC)
- o Hydrologic Command Language Data Base (HCL)
- o Preprocessor Data Base (PDB)
- o Preprocessor Parametric Data Base (PPP)
- o Processed Data Base (PRD)
- o User Parameter File (UPRM)
