

III.10-GS2OH PROGRAM TO CONVERT USGS DAILY MEAN STREAMFLOW TIME
SERIES DATA TO DATACARD FORMAT FILES (GS2OH)

Purpose

Program GS2OH reads a United States Geological Survey (USGS) [[Hyperlink](#)] mean daily streamflow time series data file and converts it to a DATACARD format [[Hyperlink](#)] file.

When converting the data:

- o the data can be output in 1, 4 or 6 columns
- o the data can be in English units or metric units
- o the output data format can be specified
- o missing data is replaced with -999

Program Execution Information

See Chapter I.2-UNIX-CALB [[Hyperlink](#)] for program execution information.
