Purpose

Command SETNSP sets which features are not currently supported.

Unsupported features are those for which the coding has been done but an official release has not been made. The codes for the unsupported features are stored in the common block SUPRTX.

Format

$$@SETNSP \begin{bmatrix} NONE \\ \{code\} \end{bmatrix}$$

Parameter Description

Parameter	Required/ Optional	Maximum Characters	Description
NONE	O		Indicates that there are no unsupported features
code	O	8	Code for unsupported feature

Sample Input

Indicate there are no unsupported features:

   @SETNSP NONE

Indicate two features as being unsupported

   @SETNSP OLD SORT
