

VI.3 DEFINITION OF THE FORECAST SYSTEMS

This Chapter contains a description of the programs used to define and maintain most of the parametric information needed by the following forecast systems:

- o Operational Forecast System (OFS)
- o Extended Streamflow Prediction (ESP)
- o Flash Flood Guidance (FFG)

The contents of this Chapter are:

<u>Content</u>	<u>Section</u>	
Introduction	VI.3.1	[Hyperlink]
Preprocessor Initialization Program (PPINIT)	VI.3.3	[Hyperlink]
Introduction to PPINIT	VI.3.3A	
PPINIT User Commands	VI.3.3B	
Description of PPINIT Algorithms and Techniques	VI.3.3C	
Forecast Component Initialization Program (FCINIT)	VI.3.4	[Hyperlink]
Introduction to FCINIT	VI.3.4A	
FCINIT Commands	VI.3.4B	
FCINIT Free Format Syntax Rules	VI.3.4C	
Extended Streamflow Prediction Initialization Program (ESPINIT)	VI.3.5	[Hyperlink]
Flash Flood Guidance	VI.3.6	[Hyperlink]
