VI.4.1 INTRODUCTION TO FORECAST SYSTEM DATA TRANSFER

This Section describes programs used to transfer data from a local
data base to the Operational Forecast System Preprocessor Data Base.

Section VI.4.2 describes the program SHEFPARS and SHEFPOST which are
used to transfer Standard Hydrometeorological Exchange Format (SHEF)
data to the Preprocessor Data Base.

Section VI.4.3 describes program BATCHPST which is used to transfer
data from the INFORMIX data base to the Preprocessor Data Base.
