Purpose

MOD QPSHIFT shifts Rating Curve by a percent discharge amount for the
period specified based on the percent difference between the
discharge input and the discharge computed from the existing Rating
Curve for the input stage.

Format

Use Format B3 with two dates on the command card. Forecast Group
identifiers cannot be specified for this MOD. The MOD applies to all
Rating Curves used in the Segment unless the Rating Curve identifier
is specified.

    .QPSHIFT startdate enddate
    identifier stage discharge [/ rcid]

    where startdate is the start date for which the MOD applies
          enddate   is the end date
          stage   is the stage value
          discharge is the discharge value
          rcid   is the Rating Curve identifier and is optional

Example

In this example Rating Curves are shifted for two Segments.

    .QPSHIFT 031400Z 0317
    GRTK1 10.4 27000
    OSMK1 27   105000
