

VI.5.3C-FCEXEC-MOD-RAINSNOW PROGRAM FCST FUNCTION FCEXEC MOD
RAINSNOW

Purpose

MOD RAINSNOW changes the temperature index to determine whether precipitation is rain or snow.

Format

Use Format B1 with no dates on the command card.

```
.RAINSNOW [ FGROUP ]  
identifier keyword dates [ / opname ]
```

where keyword is:

- o RAIN or R
- o SNOW or S

dates are the dates for which the keyword applies; valid forms are:

- o a single date
- o several dates separated by blanks or commas
- o a range of dates in the form date-date (i.e., one field with a dash separating the beginning and ending dates)

Example

In this example precipitation is specified to be rain or snow for individual Segments and ranges of Segments for various time intervals.

```
.RAINSNOW  
GRNM5-NWUM5 R 111112  
GRNM5-JDNM5 RAIN 1104-110506  
MNKM5 S 111918 112024-1121
```
