Purpose

Technique ASSMRUN sets the type of assimilation run that is to be
performed by Operation ASSIM.

The Global default is 0.

This Technique is Universal.

Form of Input

ASSMRUN runtype

>   where runtype is a value of 0, 1 or 2 specifying:
>   0 = ignore the assimilator
>   1 = run the assimilator but do not use results of
>   the previous assimilator run
>   2 = run the assimilator and use the results of the
>   previous assimilator run

Example

ASSMRUN 1

>   Operation ASSIM will be run but results of the previous assimilator
>   run will not used. These values will be saved for later use.
