VI.5.3D-CRITERIA   PROGRAM FCST HCL TECHNIQUE CRITERIA

<u>Purpose</u>

Technique CRITERIA sets whether the options selected for output
variable types NDTO or NDIS in program ESPINIT (see Section VI.3.5)
are to be changed.

Valid values are NO (O) and YES (1).

The Global default is NO (0).

This Technique is Nonuniversal.

<u>Form of Input</u>

CRITERIA type kode value

   where   type   is the 4 character output variable type (NDTO or NDIS)
          kode   is the value of KODE:
                 1 = above or greater than
                 2 = below or less than
         value is the new criteria value

<u>Example</u>

CRITERIA NDTO 1 100.
CRITERIA NDIS 2 5.

   The new criteria for output variable NDTO (KODE=1) is the number of
   days until a time series value gets above 100. The new criteria for
   output variable NDIS (KODE=2) is the number of days a time series
   value is below 5.
