VI.5.3D-SYSTEM-APIMAX   PROGRAM FCST HCL TECHNIQUE APIMAX

<u>Purpose</u>

Technique APIMAX sets the maximum API value beyond which grid point
values will not be allowed to exceed for Function MARO.

Valid values are NO (0) and YES (1).

The Global default is YES (1).

This Technique is Universal.

The Technique has one Argument which is the maximum API value.

The Global default for the maximum API value is 5.00 inches.

<u>Form of Input</u>

APIMAX(integer) max-api-value

   where   integer   is 0 or 1 specifying whether APIMAX is off or
                              on
           max-api-value is the maximum value of API (units of IN) for
                              this run of Function MARO

<u>Example</u>

APIMAX 7.00

   The example will cause the maximum value of API (for this run only)
   to be 7.00 inches. Any values of API above 7.00 will be changed to
   7.00 inches.
