Purpose

Technique PPDEBUG sets the debug codes for the Preprocessor Component routines.

Valid values are NO (0) and YES (1).

The Global default is NO (0).

This Technique is Universal.

The 20 Arguments hold 4 character debug codes which turn on various debug printout from the Preprocessors.

The Global default values for the 20 debug codes are blanks.

Form of Input

PPDEBUG codes

    where codes are one or more 4 character debug codes

Example

PPDEBUG XMDR XPOS

    Debug output corresponding to the debug codes XMDR and XPOS will be
    printed.
