

VI.5.5C-FFGDGRIB GRIB DECODER EXECUTION

The GRIB decoder program is used to check for correct encoding of the gridded flash flood guidance products.

Execution Menu

The execution menu in the DEGRIB program prompts for a filename of a file containing GRIB encoded gridded flash flood guidance products generated by the PRODGEN program.

```

                                     DEGRIB
                                     GRIB Decoder Program
                                     (using NCEP GRIB 1.0)
                                     Release x.x
- mddccyy
Enter Input filename:

```

Directory names are specified as environmental variables.
