

Purpose

Command DEFTYPE defines daily data types in the Preprocessor Data Base.

Input Data

<u>Card</u>	<u>Field</u>	<u>Format</u>	<u>Contents</u>
1	1		'@DEFTYPE'
2	1	A4	Daily data type code <u>1</u> /
	2	A6	File name <u>2</u> /
	3	I	Maximum number of stations
	4	I	Maximum number of days of data

Repeat card 2 for each data type to be defined.

3	1		'END'
---	---	--	-------

Notes:

1/ Valid daily data types are PP24, PPVR, TM24, TAVR, TF24, MDR6 and PPSR.

2/ Valid file names are PDBDLYn where n is a number from 1 to 5.

Example

```
@DEFTYPE
MDR6 PDBDLY3 544 10
PPSR PDBDLY4 100 10
END
```
