

VI.6.3-PPDUTIL-SETTODAY PROGRAM PPDUTIL COMMAND SETTODAY

Purpose

Command SETTODAY sets the date to be used as today's date.

The date specified will set the date for the '\*' date format described in Section VI.5.2B.

Format

```
@SETTODAY [ MMDD[YY]  
            LASTPP24 ]
```

Parameter Description

<u>Parameter</u>	<u>Required/ Optional</u>	<u>Maximum Characters</u>	<u>Description</u>
MM	R	2	Two digit month (01-12)
DD	R	2	Two digit day (01-31)
YY	O	2	Two digit year (00-99)
LASTPP24	R		Sets TODAY's date to the last day of data for Preprocessor Data Base data type PP24

Example

```
@SETTODAY 0604  
@SETTODAY LASTPP24
```
