

## VI.6.4 PROCESSED DATA BASE UTILITY PROGRAM (PRDUTIL)

### Introduction

The Processed Data Base Utility Program (PRDUTIL) is used to manage and display data in the Processed Data Base.

### Commands

The following commands are available:

<u>Command</u>	<u>Purpose</u>	
@DEFTYPE	Define data types	<a href="#">[Hyperlink]</a>
@DELTYPE	Delete data types	<a href="#">[Hyperlink]</a>
@DUMPSHEF	Output data in Standard Hydrologic Exchange Format (SHEF)	<a href="#">[Hyperlink]</a>
@PAGESIZE	Set maximum number of lines per page	<a href="#">[Hyperlink]</a>
@STATUS	Print Processed Data Base status	<a href="#">[Hyperlink]</a>
@STOP	Stop program execution	<a href="#">[Hyperlink]</a>
@TSDATA	Print time series headers and data	<a href="#">[Hyperlink]</a>
@TSEEDIT	Edit time series data	<a href="#">[Hyperlink]</a>
@TSHDRS	Print time series headers	<a href="#">[Hyperlink]</a>

The '@' in the command name is optional.

A description of each command and the input needed is on the following pages.

All input is in free format (blanks used to separate fields).

Only columns 1 through 72 can be used for input.

A '\$' in the first field of a card indicates the whole card is a comment.

### Program Execution Information

See Section I.2 [\[Hyperlink\]](#) for program execution information.
