

VII.7-DATACARD-CLFILE SUBROUTINE CLFILE

Description

Subroutine CLFILE closes a file.

The file must have been successfully opened using routine OPFILE.

The unit number for the file is determined in one of two ways:

- o using the KEY if it is specified
- o by using the given unit number (IUNIT)

If the unit number is specified then the first character of KEY should be a blank.

Calling Sequence

CALL CLFILE (KEY,IUNIT,ISTAT)
