

IX.3.0B-SYSTEM-HDWLDR SUBROUTINE HDWLDR

Description

Subroutine HDWLDR is called to delete a Hydrologic Command Language [[Hyperlink](#)] Local Definition Reference (LDR) or to write a changed LDR to the index file.

If a the record length of a changed LDR has been increased then HDWLDR deletes the old record and creates a new one. If the changed LDR will fit then the old record is replaced.

Calling Sequence

CALL HDWLDR (NAME, ITYPE, LDRARR, NUMLDR, ISTAT)
