Description

Subroutine HFEQLS checks a field in common block UFREEI [Hyperlink] for an '='.

It packs the left characters in LEFT and the right characters in IRIGHT. ISTRGT is set to the starting column of the right. If no '=' is found then LEFT is set to blanks and ISTRGT is set to the first position of the field.

Calling Sequence

CALL HFEQLS (IFIELD,LEFT,IRIGHT,ISTRGT)

Argument List
