

IX.3.0B-SYSTEM-HINCNX SUBROUTINE HINCNX

Description

Subroutine HINCNX increments the pointer to the Hydrologic Command Language [[Hyperlink](#)] option record for subroutine HMCHID [[Hyperlink](#)] and the other related routines.

If the pointer is greater than LRECOP(16) then it reads a new record and resets the pointer to 1. All pointers are in common block HSEG1 [[Hyperlink](#)].

Calling Sequence

CALL HINCNX

Argument List

None
