

COMMON BLOCK GBOXOT

Purpose

Contains information to allow displays of grid point hydrologic data (PG24, APIG, and GRNF) on a degree box background as a runtime option in MARO.

Listing

COMMON /GBOXOT/ MPTBOX(20), NBXDSP, IBXALL, NUPCPN, NUMAPI, NURNOF

Size

25 words

Variable Description

| <u>Variable</u> | <u>Type</u> | <u>Dim.</u> | <u>Word Pos.</u> | <u>Description</u> |
|-----------------|-------------|-------------|----------------------|---|
| MPTBOX | I | 20 | 1 | Array of degree boxes (20 max) to display grid point data for. |
| NBXDSP | I | 1 | 21 | Number of degree boxes given in the MPTBOX array. |
| IBXALL | I | 1 | 22 | Key to display indicated grid point data for all degree boxes. 1 = Display for all degree boxes. 0 = Do not display for all degree boxes. Display only for those degree boxes whose number appears in the MPTBOX array. |
| NUPCPN | I | 1 | 23 | Number of PG24 displays to generate. |
| NUMAPI | I | 1 | 24 | Number of APIG displays to generate. |
| NURNOF | I | 1 | 25 | Number of GRNF displays to generate. |
