Purpose

Common block FCIO controls output of carryover to temporary sequential carryover files.

Listing

COMMON /FCIO/ IDSEG(2),NCVALS,ICFNUM(20),NVALSW(20)

Description of Variables

Variable	Type	Dimension	Word Position	Description
IDSEG	I*4	2	1	Segment identifier of the Segment with the last record written to the temporary sequential files; initial value set to blank in subroutine FINICO [Hyperlink]
NCVALS	I*4	1	3	Length of array C for Segment; initial value set to zero in subroutine FINICO
ICFNUM(20)	I*4	20	4	File numbers of the temporary carryover files; index corresponds to the 20 carryover days stored in ICDAY in common block FCARY [Hyperlink]; initialized in subroutine FINICO
NVALSW(20)	I*4	20	24	Count of the number of values written to each file for Segment
