

IX.3.3C-SYSTEM-FSGLST COMMON BLOCK FSGLST

Purpose

Common block FSGLST contains the list of Segment identifiers and corresponding record numbers obtained from records 3 through (NS+2) of file FCSEGPTR [[Hyperlink](#)].

Common block FCSEGP has the value of NS.

If the size of common block FSGLST [[Hyperlink](#)] is too small to hold all the Segments defined on the file then it will be filled from the first values on the file. File FCSEGPTR must be searched directly for any Segment identifiers which common block FSGLST cannot hold.

Listing

```
COMMON /FSGLST/ MLIST,NLIST,IDZ(3,mlist)
```

Description of Variables

<u>Variable</u>	<u>Type</u>	<u>Dimension</u>	<u>Word Position</u>	<u>Description</u>
MLIST	I*4	1	1	Maximum number of Segments
NLIST	I*4	1	2	Number of Segments
IDZ	I*4	(3,MLIST)	3	Segment identifiers and record numbers: <ul style="list-style-type: none">o IDZ(1,I) and IDZ(2,I) contain the identifier for Segment number Io IDZ(3,I) contains the record number on file FCSEGSTS [Hyperlink] for Segment number I
