Purpose

Common block MOD102 contains the variable portion of the baseflow
values obtained from the BASEF MOD [Hyperlink] or BFRATE MOD
[Hyperlink] to replace the baseflow in the current BASEFLOW Operation
[Hyperlink].

Only values that fall within the current run period are stored.

This common block is filled only for BASEFLOW Operations that have the
variable baseflow recession enabled.

Listing

COMMON /MOD102/ NDT02,IDT02(5),VAL02(5)

Description of Variables

Variable	Type	Dimension	Word Position	Description
NDT02	I*4	1	1	Number of variable baseflow values and dates entered through BASEF or BFRATE MODs for the current BASEFLOW Operation
IDT02	I*4	5	2	Julian hours in chronological order for the variable baseflow values in array VAL02
VAL02	R*4	5	7	Variable baseflow values to be applied at the dates stored in array IDT02 (units of CMS)
