Purpose

Common block MOD129 contains API values obtained from the APICQN MOD
[Hyperlink] to replace the API values for an API rainfall-runoff
Operation.

Only values that occur at the end of a hydrologic day within the
current run period are stored.

Listing

COMMON /MOD129/ NDT29,IDT29(5),VAL29(5)

Description of Variables

Variable	Type	Dimension	Word Position	Description
NDT29	I*4	1	1	Number of API values and dates entered through an APICQN MOD for the current API Operation
IDT29	I*4	5	2	Julian hours in chronological order for the API values in array VAL29
VAL29	R*4	5	7	API values to be applied at the dates stored in array IDT29 (units of IN)
