Description

Subroutine PCMPBT compacts the header portion of a Processed Data Base time series record.

The first 7 words are changed from I*4 integer words and placed in 3 words as I*1 and I*2 values in the output array. The input array of dimension of 22 words is compacted to 18 words.

Calling Sequence

CALL PCMPBT (IHEADI,IHEADO,ISTAT)

Argument List

Argument	Input/ Output	Type	Dimension	Description
