

IX.4.3C-MPFO PREPROCESSOR PARAMETRIC DATA BASE PARAMETER ARRAY MPFO:  
MAP FORECAST GROUP COMPUTATIONAL ORDER PARAMETERS

Purpose

Parameter array MPFO contains Forecast Group computational order parameters used by the Mean Areal Precipitation (MAP) Preprocessor.

Array Contents

<u>Starting Position</u>	<u>Dimension</u>	<u>Type</u>	<u>Input/Generated</u>	<u>Description</u>
1	1	I*4	G	Parameter array version number
2	1	A8	G	Forecast Group identifier
4	2	R*4	G	Unused
6	1	I*4	G	Number of MAP areas in Forecast Group (NMAP)
7	NMAP	A8	G	MAP area identifiers <u>1/</u>
7+2*NMAP	NMAP	I*4	G	Record numbers for MAP station parameters (parameter type MAPS) <u>1/</u>

Notes:

1/ The list is ordered based on the computational order defined in the Forecast Component Data Base.
