

IX.4.3C-SYSTEM-OG24 PREPROCESSOR PARAMETRIC DATA BASE PARAMETER ARRAY
 OG24: WGRFC GRID SYSTEM GRID POINT STATION
 ALPHABETICAL ORDER PARAMETERS

Purpose

Parameter array OG24 contains alphabetical order parameters for all precipitation stations with a WGRFC grid system grid point address.

Array Contents

<u>Starting Position</u>	<u>Dimension</u>	<u>Type</u>	<u>Input/Generated</u>	<u>Description</u>
1	1	I	G	Parameter array version number
2	1	I	G	Indicator how list was ordered: 1 = by station identifier 2 = by station description
3	2	R	G	Unused
5	1	I	G	Number of stations in list (NSTA)
6	2*NSTA	I*2	G	For each station: <u>1</u> / (1) = the PPPDB record number of the GENL parameters (2) = the grid point address

Notes:

1/ Record number is the record number of the parameter array in the PPPDB and the grid point address is the grid point address stored in the GENL parameter array. Only stations with the grid point address defined are included.
