IX.6.2-SYSTEM-EPG   SUBROUTINE EPG

Description

Subroutine EPG plots each line.

Calling Sequence

CALL EPG (NUMT,G4,IP,IDTS,J)

Argument List

Argument	Input/ Output	Type	Dimension	Description
NUMT	Input	I*4	1	Number of time series to be plotted
G4	Output	A*1	121	Plot symbols for a given line of the plot; the location in the array indicates the number of spaces from the left margin that are skipped to plot the symbol
IP	Input	I*4	6x51	Plot positions for fitted time series
IDTS	Input	I*4	5	Indicator for type of time series for time series to be plotted
J	Input	I*4	1	Line number of the plot (from the top)
